

# iCorps Cybersecurity Training

## Customized End-User Training

### Cybersecurity Awareness Training

When it comes to cyber threats, your employees are often the largest and most vulnerable attack surface. One of the most effective means of securing your employees is consistent and customized training. iCorps offers cyber awareness training to educate your staff and internal IT about the latest threats. Our custom trainings cover:

#### 1. Different Cyber Threats

- SPAM, Phishing, and Social Engineering
- Malware and Ransomware

#### 2. Identity Services

- Multi-Factor Authentication and Password Security
- Protecting Usernames

#### 3. Internet-Related Threats

- Email, Social Media, and Web Site Usage

#### 4. Protecting Company Data

- Viruses, Data Loss, and Secure Data Sharing

#### 5. How to Report Cybersecurity Issues

#### 6. Testing and Reporting

Our training programs are designed around your use of technology and industry best practices. We offer virtual and in-person training sessions, which are capped at 10 participants per session. Each session is followed by an exam. The fee for this service is:

- \$1,000.00 per training session – up to 10 participants
