

iCorps' Encompass Edge Program Outsourced IT Support Services

Enable Your Business with Cloud Innovation

Whether you're a startup born in the cloud or an established business looking to evolve in the cloud, iCorps' Encompass Edge program provides your company the expertise to efficiently manage a cloud-based IT infrastructure and workforce. Encompass Edge's proactive IT services, planning and expertise ensures optimal performance from the systems that support your business. This program delivers significant cost savings and makes budget planning more predictable. You'll gain a highly certified, and experienced cloud consulting team dedicated to making sure that your cloud investments are driving productivity, security, and efficiency.

How Encompass Edge Works

Encompass Edge has three key stages: Assessment and Planning, Migration and Enablement, and Optimization. During the first stage, our consultants perform a 360 Technology Assessment, Cloud Readiness Analysis, or Cloud ROI Evaluation. This provides a comprehensive view of your existing environment and allows our experts to prioritize areas for improvement. During the Migration and Enablement stage, our cloud consultants are focused on modernization services, and deploying cloud platforms that streamline workflow and boost productivity. After that, we focus on continuing to optimize your cloud services and investments. We provide comprehensive advisory services, protection and service management, and improved end-user experiences.

■ FIXED IT SPENDING ■ APPROVED AND ACCOUNTED FOR VARIABLE IT SPENDING ■ MINIMIZE ALL UNPLANNED IT SPENDING ■ REMOTE SUPPORT

A Proactive Approach to Digital Transformation

Managing a cloud environment would prove difficult for businesses with limited internal resources and/or lack of cloud expertise. Thankfully, iCorps experienced consultants and cloud experts have developed a plan detailing how the Encompass Edge program will benefit your business and the tools our iCorps team will use to maximize your investment in your IT and company's success.

Encompass Edge delivers advisory services that focus on strategic cloud adoption, integration, and management. Our consultants deploy protection and service management across your cloud and IT assets, monitoring health, access, and consumption. These real-time insights allow our cloud experts to optimize your cloud investments and provide refined experiences for your end-users and customers.
