PROJECTS

iCS can help you manage your IT project portfolio, from hard/software deployments, to upgrades, and optimizations. Our experts work alongside internal staff, or independently, to move your projects and business forward.

STAFFING SUPPORT

Projects, seasonal demand, and vacations all strain your internal IT resources. By augmenting your IT staff with iCorps, you'll have access to technical, product, and project resources - from C-level strategic guidance to certified specialists.

STRATEGIC CONSULTING

iCS provides C-level consulting with skilled professionals that understand both your technology and business goals. iCS provides strategic IT planning and direction to ensure technology power your business effectively - today and tomorrow.

SPECIALIZATION

Even the largest organizations supplement projects with specialists. Our consultants provide critical insight and technical resources in areas of compliance, security, deployment, etc. Our competencies include Microsoft 365, Azure and AWS cloud services, endpoint and network security, and more.
